

Recycling by name, re-manufacturing by nature

Together we can all be part of better.

RECYCLING

A leader in commercial and industrial recycling services

Our scale and expertise brings reliability and results for commercial paper and cardboard collections with an extensive metro network of processing facilities equating to far-reaching, national coverage from the smallest corner shop to large multi-national retailers. As Australia's largest integrated business linking recycling and re-manufacturing, we're an integral partner in helping you work towards your sustainability targets.

 **8,800**
commercial
customers

 **13,000**
sites serviced
per year

 **550,000**
collections
per year

An unmatched, local circular economy model

Our integrated resource recovery and re-manufacturing loop means that recovered paper and cardboard is sent to one of our 8 paper mills across Australia and processed into high quality pulp and converted into recycled paper reels for new packaging products. And, once cardboard is discarded, it can be recovered for re-manufacture again providing a true closed-loop solution and powering the circular economy.

Resource recovery for your business

We are constantly innovating and investing to find better ways to recover, recycle and re-manufacture packaging from recyclable materials.

- ✓ Recovering 1.3m tonnes paper and cardboard each year
- ✓ 20 recycling operations across Australia
- ✓ Manufacturing 815,000 tonnes of recycled paper

Ask us about how your business can benefit from our unique, local closed loop model.

Thinking and acting for the long term today
